METHODOLOGY

Global Finance's editors select the winners for the Best Treasury & Cash Management Awards with input from industry analysts, corporate executives and technology experts. The editors also use entries submitted by financial services providers, as well as independent research, to evaluate a series of objective and subjective factors. This year's awards will be based on the period from January 1, 2024, to December 31, 2024.

Global Finance uses a proprietary algorithm with criteria—such as knowledge of local conditions and corporate customer needs, quality of product and service offerings, financial strength and safety, market standing, compliance, and excellent customer service—weighted for relative importance. The algorithm incorporates various ratings into a single numerical score, with 100 equivalent to perfection. In cases where more than one institution earns the same score, Global Finance favors local providers over global institutions, and privately owned banks over government-owned ones.
